FISCAL NOTE ANALYSIS

STATE OF ALASKA
2018 LEGISLATIVE SESSION**Analysis**

This proposal adds a new section (.191) to AS 28.35 which stipulates the requirements for motor vehicle headlight use. The proposal also annuls 13 AAC 04.010 (c) and (d). Eliminating these regulatory citations would require the department to remove approximately 143 Head Lights On At All Times (HOAAT) signs throughout the state. In 2011, 62 of these signs were placed within the state's 4 Safety Corridors following the recommendations of a 2010 Safety Corridor audit. The other 81 signs were placed in southeast Alaska in 2014 with \$25 thousand of Federal Highway Administration (FHWA) HSIP (Highway Safety Improvement Program) funding.

Headlights are a low-cost method to reduce crashes by increasing vehicle conspicuity and making it easier to detect approaching vehicles from farther away. Nearly all published reports indicate the use of headlights reduce multiple-vehicle daytime crashes, including studies conducted in Scandinavia, Canada, and the United States. Available studies document crash reductions of 5% to 15% due to the use of daytime headlight use.

If the Legislature intends for the department to immediately remove all signage, we estimate a cost of \$20 thousand. Otherwise, the signs will get removed in the daily course of business as staff are in the affected areas doing routine highway maintenance.
